

MISSION - FDE SOLAR SRL

- To create high quality products using the best materials on the market thanks to continuous research and constant collaboration with our customers and suppliers;
- To make use of competent personnel who are constantly updating both new techniques and safety in the workplace;
- To observe the punctuality of delivery;
- To always strive to improve organization in terms of service quality, efficiency and cost-effectiveness of processes; in particular:
 - to continue to focus on customer satisfaction by offering an increasingly complete and high quality service at competitive conditions;
 - to consolidate and to increase its presence on the national and European market;
 - to characterize company growth by investing in specialized personnel;

VISION - FDE SOLAR SRL

Over the years, the vision of the founders has been revisited to better interpret the complexity of the market and to update the vision of how our action can be useful to society. Today our corporate mission reads: **"To be leader in the supply of products and solutions for heat exchange that favor sustainable development and efficient management of natural energy from the sun to be considered in the eyes of our customers as the best commercial partners on the market".**

The founding principles of the social utility of our action and the excellence of the service and products provided are thus respected and revitalized.
